EDUCATION

- **Perm State University** Perm, Russia
Not Finished. Sep. 2013 – Jun. 2015
Master of Science, Finance and Information Technology.
Research bubbles on financial markets using LPPL-models
and systemic risks in Europe Banking System. CFA Institute Research Challenge 2014 participant.
- **Perm State University** Perm, Russia
Graduated at Jul. 2012
Specialized in Computational Fluid Dynamics.
Research convection of liquid ternary mixtures in connected channels.

EXPERIENCE

- **Tencoins** Malta
Software Engineer June. 2018 – present
 - **Software Engineering:** Design and build a core of cryptocurrency exchange service with microservice architecture. Create cryptocurrency wallets for Bitcoin, Ethereum, Tether (Omni layer).
- **Consulting, Self Employed**
IT Consultant Sep. 2016 – June. 2018
 - **Consulting in IT:** Research project domain. Build web-services (services with Django/Django REST, Postgres, AngularJS/ReactJS, mobile apps with Ionic).
- **Votetour**
CEO, CTO Mar. 2017 – Sep. 2017
 - **Management:** Arrange software engineering workflow with continuous integration and test driven development practices.
 - **Business Development:** Building B2B relationship between airlines and Votetour company.
 - **Software Engineering:** Requirement analysis, architecture, design, and development cloud based platform for tourist collaboration, arrangement, and booking charter air flights through the world; a platform for partners airlines to arrange charter flights for a group of tourists.
- **Nebulytics** Moscow, Russia
Software Engineer May 2015 – Sep. 2016
 - **Platform Development:** Participate in development core features for proprietary SaaS platform. Architecture and develop solution for server (using Java/Groovy/Grails/Python stack of technologies as a base for server side components), client (javascript/jquery/Bootstrap) and database (MariaDB/MySQL/Percona and proprietary MySQL framework written on C++ macros in version one and Lisp in version two) side of the platform.
 - **Consulting:** Requirement analysis, architecture, design, and development solutions for company customers, using Nebulytics platform.
 - **DevOps:** Tuning Nginx load balancer. Config the Elasticsearch/Logstash/Kibana stack for server performance monitoring. Write scripts for serving existing code (bash, Perl).
- **JSC Prognoz, Center solutions for financial markets** Perm, Russia
Software Engineer Aug. 2014 – May 2015
 - **R&D:** Research fraud activity on the Moscow Stock Exchange. Develop models which allow regulator (Bank of Russia) investigate money laundering, insider trading, etc.
 - **Software Development:** Integrate a created models into existing stock exchange monitoring application (Delphi/PL/SQL/Oracle Database). Develop the tool for connecting to Moscow Stock Exchange and receiving transactions data using FIX/FAST protocol (C++).
- **JSC Prognoz, Direction of international development** Perm, Russia
QA Engineer May 2013 – Aug. 2014

- **Quality Assurance:** Testing mobile, web and desktop applications, application backends and REST/SOAP services. Coordination of development teams.

- **Scientific Industrial Instrument Making Company, R&D Department**

Perm, Russia

Research Engineer

Oct. 2011 – May 2013

- **Measurements automatization:** Create test stands for fiber laser, fiber angular velocity sensors, and integrated optical modulators, which allow automatically measure optical characteristics using a stack of devices such as optical spectrum analyzers, power meters, optical switches, thermal boxes. Write software to manipulating it using PC and report generation (LabView, C#).
- **R&D:** Participate in applied research of fiber lasers for sources of light for fiber optic gyroscope, markers for a metal, and fiber optic amplifiers for telecom purposes. Research its behavior in a wide range of temperature conditions and under vibrations.
Application research a behavior of sensors under conditions of temperature changes. Theoretical study of noises in sensors with spectral methods.

- **Perm State University**

Perm, Russia

Assistant of Physics Department

Oct. 2011 – Feb. 2012

- **Assistance:** Demonstration of physics experiments.

PROGRAMMING SKILLS

- **Languages:** Python, Java, Javascript, SQL, Go
Technologies: Linux, CI, TDD, Agile, Django/Django REST, Asyncio, Microservices, Postgres, REST, Blockchain, RDBMS, Git, Redis
